

HPM Easy Biofeedback 2 channel system

This modern system for Biofeedback training is a complex solution, aimed at a wide range of users. Begin working with a 2 channel apparatus, which allows you to, in any moment, expand the device by an extra 2 channels to create a 4 channel system.

Standard equipment

- The HPM Easy biofeedback 2 channel signal booster has 6 permanent "touch proof" entries, which allow you to, in any moment, expand the 2 channel apparatus to a 4 channel system without the need to exchange the device
 - **Polish Product!**
 - input impedance at least 100Mohm
 - input capacity no greater than 100pF
 - 50 Hz noise suppression filter for the best possible impulse response (presentation of the waveform for a 10Hz square wave with the notch filter on)
 - data reception frequency (OWR) 2000 samples per second per channel
 - the amplifier meets the electrical safety requirements according to PN-EN 60601-1
- Laptop (INTEL i5, SDD 256 GB nVidia, Windows 10) with an extra LCD monitor
- Intuitive and friendly in use programming of the HPM Easy biofeedback system, available in its entirety in polish
- set of games for leading training in virtual reality allowing for connection of Oculus goggles.
- "Easy Module" allows for automatic setting of the difficulty level of the game. The beams set themselves up on their own and continuously adjust the difficulty level. There is the option of changing the difficulty level online, which is applied immediately during training to the results of the game.
- Training result comparison function
- Record of wave based on RMS calculations
- Set of cup electrodes (all electrodes placed on the head, including the reference and ground electrodes)
- Intuitive, easy in use and friendly to the user programming, available in its entirety in polish, for registration of clients, checking correct electrode placement, recording, piloting the Easy biofeedback board as well as creating reports
- Plastic container with an opening for soaking electrodes in saline solution
- Measurement and mapping of impedance in real time (online) during training, constantly visible on the trainers screen
- Constant record of the curve and the opportunity to open the record in any moment after the training

Modern Biofeedback cap:

- Cap made of flexible material
- Points from the 10/20 system are marked on the cap
- All the 10/20 system points must be correctly described
- Cap equipped with special clips for the cup electrodes
- The cap has holes for easy gel application
- The cap has a chin strap to easily keep it on the head
- Cap in size M (48-54 cm) in red
- Gel with good conductive properties 470 g
- Syringe with a pipette for applying the gel

New Easy Biofeedback Functions:

- Modern, 5th generation apparatus
- Intuitive and easy in use Polish programming
- You can define your own training protocols
- Online software updates via the Internet
- „Puzzle” game – ability to upload photos
- „Film” - ability to play films

price **3 000,00 €**

HPM Easy Biofeedback 4 channel

Modern Biofeedback training system which works precisely in all circumstances, the permanent programming allows for 8 wave preview in the form of bars on the trainers screen during training (Delta, Theta, Alfa, Beta 1, Beta 2, Hi Beta, Gama)

Standard equipment:

- 4 channel Easy Biofeedback biological signal booster with 6 built in "touch proof" entries
 - Polish Product!
 - input impedance at least 100Mohm
 - input capacity no greater than 100pF
 - 50 Hz noise suppression filter for the best possible impulse response (presentation of the waveform for a 10Hz square wave with the notch filter on)
 - data reception frequency (OWR) 2000 samples per second per channel
 - the amplifier meets the electrical safety requirements according to PN-EN 60601-1
- Laptop (INTEL i5, SDD 256 GB nVidia, Windows 10) with an extra LCD monitor
- Intuitive and friendly in use programming of the HPM Easy biofeedback system, available in its entirety in polish
- set of games for leading training in virtual reality allowing for connection of Oculus goggles.
- "Easy Module" allows for automatic setting of the difficulty level of the game. The beams set themselves up on their own and continuously adjust the difficulty level. There is the option of changing the difficulty level online, which is applied immediately during training to the results of the game.
- Training result comparison function
- Record of wave based on RMS calculations
- Set of cup electrodes (all electrodes placed on the head, including the reference and ground electrodes)
- Intuitive, easy in use and friendly to the user programming, available in its entirety in polish, for registration of clients, checking correct electrode placement, recording, piloting the Easy biofeedback board as well as creating reports
- Plastic container with an opening for soaking electrodes in saline solution

- Constant record of the curve and the opportunity to open the record in any moment after the training

Modern Biofeedback cap:

- Cap made of flexible material
- Points from the 10/20 system are marked on the cap
- All the 10/20 system points must be correctly described
- Cap equipped with special clips for the cup electrodes
- The cap has holes for easy gel application
- The cap has a chin strap to easily keep it on the head
- Cap in size M (48-54 cm) in red
- Gel with good conductive properties 470 g
- Syringe with a pipette for applying the gel

Nowe funkcje Easy Biofeedback:

- Modern, 5th generation apparatus
- Intuitive and easy in use Polish programming
- You can define your own training protocols
- Online software updates via the Internet
- „Puzzle” game – ability to play stories
- „Film” game - ability play games

price **4 000,00 €**

Certified Easy Biofeedback Training

We organize 1st and 2nd degree Biofeedback training courses affirmed with a certificate

Knowledge

We provide you with essential knowledge on how to correctly carry out Biofeedback training.

Experience

Thanks to our wisdom and experience we can comfortably tell you that we host the best practical courses in Poland.

Education

We will teach you how to correctly carry out training, how to tailor the correct program to fit your needs and how to work with Biofeedback devices

We organize professional, certificated, and above all reliable training courses and workshops with the application of Biofeedback training for all those who are interested. The training is organised in small groups which gives an individual approach to every trainee. With the expectations of our clients in mind, we have created weekend training courses especially for you. The two day courses are organized on Saturdays and Sundays, after which you will get the full title of 1st or 2nd degree Biofeedback trainer

**There is the option to organise a course anywhere in Poland.*

The price of a training course in our HPM training centre in Warsaw, Poznan or Gliwice is 1500 € per person

The price of a training course at the clients location is 2000 €

- 1st and 2nd degree Biofeedback training courses
- We run classes in small 4/6 person groups
- There is the option to organize a training course anywhere in Poland
- We work with Easy Biofeedback apparatus from a Polish producer
- We can advise you on the topics of office organisation and writing protocol.
- Constant, substantive support after training
